Many bakers refer to me as a "third hand"!

# HOW TO USE A SCRAPER

This month's tool is known as a "Bakers Best Friend!"

Bakers use this tool for many uses – including scraping the bowl, cutting dough neatly into pieces and cleaning the bench!

A dough scraper is a small rectangular piece of stainless steel or plastic used to help bakers and pastry chefs handle dough. It is flat and easy to scoop with. As our hands produce a lot of heat, having a scraper stops dough from sticking to your hands!

Or scraping  
a bench!

You can  
also use a  
scraper for  
mixing
